HP METEC

When quality becomes reality

HP Metec are specialized on the area of geometrical measuring in the production environment. Our field of application is the development, construction and manufacturing of simple measuring devices to shaft measuring devices with many measuring points, up to fully automated measuring machines. Our measuring systems are developed for accurate control of dimensions as well as form and position tolerances of work pieces.

Most of our references come from the metal-working industry. Quantity production of work pieces with high accuracy is our biggest market. Our high quality standard and the innovation strength of our specialists make a repeating accuracy possible to less than a micron.

What can we do for you?

We offer a technical solution with our standard products or the development of a customized solution for you. The electronic processing of measuring data and the automation of our measuring devices we use products from our German partner Promess (www.promess-gmbh.de). You receive from us a complete solution, from the first inquiry, up to start-up, training and maintenance!
