

Measuringmachine for ring thicknesses

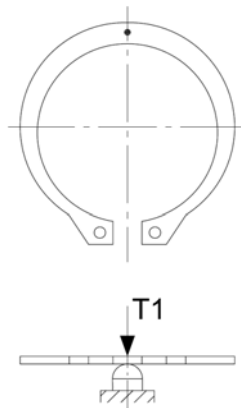

When quality becomes reality

HP Metec have developed a solution for a reliable measurement of ring thicknesses. With this measuring device the thickness can be measured of most different rings and disks, like retaining rings, snap rings or shims. For example this measuring device can be used for the mating of retaining rings with shaft slots.

- easy calibration
- Measure thickness up to 5mm
- Master recognition
- Repeating accuracy: $< 2 \mu\text{m}$
